New Pricing

We are changing our license structure to allow our customers to better tailor the license level for their infrastructure. If you buy or renew before October 1st, 2017, you will qualify for this incredible value.

Save Money

Buy before October 1st, 2017 and you can save up to 80%. If you purchase after you will pay the new price. This will also lock in grandfathered pricing for future renewal as long as you do not let your license benefits lapse.

Stay Up to Date

At Nagios we strive to never stop improving our products. With active maintenance benefits you receive all updates from bug fixes to major upgrades. These updates give you the latest, most significant benefits our products have to offer. Stay in compliance by obtaining frequent security vulnerability patches!

Technical Support

Don't let your problems take over, our certified technical support staff is here to help. With active support and maintenance benefits you will receive access to direct email support as well our customer only support forum, both of which offer a one business day guaranteed response time.

Product Influence

We value every piece of feedback we receive when determining the future of our products, but with an active support or maintenance plan your feature requests get moved to the front of the line. Our developers are constantly incorporating customer feedback and ideas into new releases. Become a member of the Nagios Community and join the revolutionary minds of IT.
